

Keyring Tag

Read Only / Read Write

Specifications:

Part Number	RI-TRP-RFOB-01	RI-TRP-WFOB-01
Functionality	Read Only	Read/Write
Memory (Bits)	64	80 *
Memory (Pages)	1	1
Operating Frequency	134.2 kHz	
Modulation	FSK (Frequency Shift Keying) 134.2 kHz / 123.2 kHz	
Transmission Principle	HDX (Half Duplex)	
Power Source	Powered from the reader signal (batteryless)	
Typical Reading Range	≤ 60 cm**	
Typical Programming Range	---	30 % of specified reading range
Typical Reading Time	70 ms	
Typical Programming Time	---	309 ms
Typical Programming Cycles @ 25 °C	---	100,000
Operating Temperature (Read)	-40 to +85°C	
Operating Temperature (Program)	---	-40 to +70°C
Storage Temperature	-40 to +85	
Case Material	Plastic (ABS) / glass insert (Transponder)	
Protection Class	Hermetically sealed (Transponder)	
EMC	Programmed code is not affected by normal electromagnetic interference or x-rays	
Signal Penetration	Transponder can be read through virtually all non-metallic material	
Drop Test	Dropped 10 times from a height of 1.90 m onto concrete	
Dimensions	Ø 10.5 mm * 37.5 mm ± 0.3 mm	
Weight	Approx. 4.5 g	
Reference Standard Transponder	23 mm Glass Encapsulated Transponder Reference Manual # 11-09-21-023	

* We recommend that you split each 80 bit page into 64 user programmable bits plus a 16 bit wide CRC CCITT Block Check Character as is done by TI-RFID LF readers.

** Depending on RF regulation in country of use, the Reader Antenna configuration used, and the environmental conditions.
